---

## PROFILE

---

Data Enthusiast, experienced developer working for 3 years in Qlik, Python, SQL, and PowerBI. Proven ability to analyze and organize large datasets, create data models, design and implement ETL processes, and investigate complex problems. Skilled in developing data-driven solutions for organizations using Agile frameworks to ensure adaptability, continuous improvement, and customer-focused results.

---

## WORK EXPERIENCE

---

### Zenith Service S.p.A

**Jun. 2020 – Present**

#### *Business Intelligence Developer*

*Milano, MI, Italy*

- Leveraged SQL, Qlik, and Python to proficiently acquire, cleanse, consolidate, and analyze data from both internal and external sources, resulting in the generation of actionable insights that tangibly improved business performance.
- Spearheaded the development of over 200 tailored Qlikview applications, meticulously gathering and Scrutinizing internal and external requests to deliver data-driven solutions that streamlined operations and empowered decision-making.
- Collaborated closely with the English acquiring company, fostering seamless integration and communication with international colleagues to successfully guide the initiation and execution of key IT projects, ensuring their alignment with the overarching business objectives.
- Proficiently developed ETL applications, optimizing data extraction, transformation, and loading processes. This experience includes working with Pyspark, and Azure Data Factory.
